Doctors on Mission International

Introduction

Doctors on Mission international is a volunteer based non-for-profit fully registered organization uniting like-minded Christian medical professionals with the aim of serving humanity with freely accessible, acceptable and reliable medical and surgical needs to reduce the burden on medical care on the community while serving God and bringing healing to communities. This is done through tailor-made community interventions like medical and surgical missions, humanitarian emergency relief, nutritional rehabilitations programs, satellite medical facilities and medical training sessions for health workers in the community.

Vision

Uniting Christian medical teams with skills & training to provide free quality, accessible and acceptable medical care to vulnerable communities with lifesaving healthcare.

Mission

To enable free access to universal healthcare to all communities while bringing healing to communities and bridging the gap to healthcare needs.

Ministry through Medical Missions

A ministry of healing does not happen from a distance. To bring health, the physician must be physically present. Jesus is the ultimate model, showing that an embodied presence is necessary to bring healing and hope to others.

Though Jesus is fully God, He is also fully human. He knows what pain and suffering is and can identify and sympathize with those who are hurting and bring comfort. Jesus shows us how effective ministry is to be done. He calls us to reach out to the vulnerable and the sick.

Amigos Internacionales

Amigos internacionales is a non-profit organization dedicated to addressing critical needs in underserved communities worldwide. Through initiatives medical campos, educational programs, and infrastructure projects, they strive to foster

sustainable development and holistic well-being. Founded in 1967, Amigos Internacionales, Inc. began with a vision to provide emergency services and disaster relief across the globe.

Over the years, their mission has evolved, concentrating on impactful initiatives in Africa through their Mission point campaign. Today, they dedicate themselves to building communities by establishing churches, schools, and essential infrastructure like water wells, particularly in regions impacted by the South Sudan refugee crisis. Their commitment extends beyond immediate relief to fostering sustainable development, spiritual growth, and community resilience.

Driven by partnerships and volunteerism, we strive to create a lasting difference in the lives of the underprivileged, transforming their futures through faith, education, and practical support.

Bethel Smile Project

The burden of cleft lip and palate (CLP) in Uganda is significant, primarily manifesting as high rates of malnutrition, with children suffering from feeding difficulties leading to poor growth and failure to thrive. The condition imposes a substantial human and economic burden due to delayed treatment and potential surgical complications. Additionally, a cultural perception of CLP as a curse, lack of community awareness, and financial hardship contribute to delayed presentation and inadequate care for affected children. Most of the communities

in northern Uganda discriminate against mothers and children cleft palate & Lip.

The annual prevalence of infants born with cleft lip with or without or cleft palate is 10 in 10,000. Families with children born with cleft lip and/or cleft palate face an economic burden. Average health care costs for children ages 1 to 10 years with cleft palate only and both cleft lip and palate are about 6 times higher than average costs for children without clefting, and are 3 times higher for children with only a cleft lip.

Goal/ Objective

The aim of this project is to increase the provision of quality, professional surgical & medical care children born with cleft palate & lip anomalies in order to reduce health disparities for all people regardless of their ability to afford, age, race, disability, ethnicity, religion and origin.

Location

Northern Uganda

Date of launch

30th August 2025

Target Population

Children under 5 years with congenital cleft palate & Cleft lip

Surgeons under the program

Dr Martin Tungotyo, MB CHB, M.MED PLAST.
Dr Agaba Brian, MB CHB, M.MED E.N.T, FCS PLAST.

Medical volunteers

Volunteers will be mobilized form partner hospitals.

Medical Supplies

The camp will entirely receive supplies from friends and partners of Doctors on Mission with support from partners.

Mobilization

The mobilization drive will be through village health teams, local community leaders, church leaders and village leaders
